

RM GASTRO

World-class kitchen solutions. For real professionals.

Passion and Quality

If you want your business to have long-term success, you have to work diligently. Rudolf Heinz established his puppet company in 1892. Thirty years later, Ladislav Mrkvička began sewing shoes in Kralupy nad Vltavou. Both companies were successful but their development ended during the intervention of the Communist regime.

This tradition however has since been revived. In 1994, the descendants of both entrepreneurial families, Jan Richter and Ladislav Mrkvička, joined forces to establish RM Gastro. A puppeteer's passion for details and a shoemaker's conscientiousness of his skill came together to give rise to the exceptional products that have helped modernise Czech gastronomy.

Customers showed their appreciation. In 1998, thanks to their good graces, RM Gastro opened a new production line in Veselí nad Lužnici. One year later, they opened their first branch in Slovakia and six years later in Poland. Today, the dream of the company's founders has grown to employ 230 people, with an annual turnover of 800 million Czech kronas, and with thousands of satisfied customers from more than fifty countries around the world.

RM GASTRO.

World-class kitchen solutions. For real professionals.
