Combi convection steam oven STEAMBOX electric 6x GN 1/1 touch screen boiler 400 V				
Model	SAP Code	000086	04	
1	A symbiotic steam generation system simultaneous use of direct injection and boiler, maintenance of 100% humidity, or its regulation – preparation of different dishes and cooking styles in	7	A kit of two machines on top of each other connection kit allowing two machines to be placed on top of each other connects the connections, inlets, wastes and ventilation of the lower combi oven	
2	an environment precisely set for the food or dish Digital display simple multi-line backlit display of 99 programs with 9 cooking phases - help with cooking even for less skilled cooks, safe baking even in the absence of an operator; create your own recipes; easy to use	8	 allows the user to place two machines in smaller spaces to increase production; the chef can prepare two different dishes simultaneously Premix burner the only burner with a turbo pre -mixing gas with air on the market 	
3	Weather system patented device for measuring steam saturation in real time and in steam mode, the only one on the market - precise information for the operator about the steam saturation in the cooking area		the structure of the burner to V which prevents backfill and banging This design saves 30 % of gas compared to conventional burners – faster heat-up faster more comfortable operation Automatic washing	
4	 Steam tuner a control element that enables setting the exact saturation of steam in the cooking chamber during the cooking process possibility of cooking different types of cuisine, from very moist steam for typical Czech dishes to low-saturated steam for e.g. French cuisine 	9	 integrated chamber washing system possibility to use liquid and tablet detergents option to use vinegar as a rinse agent the system simultaneously descales the micro-boiler the chamber of the conveyer is washed without the presence of the operator, for example overnight; the system decalcifies the micro-boiler without the need for service intervention; the chamber is maintained 	
5	 Pass-through door the door is also built into the back of the combi oven, while full control is retained from the side of the cook enables the distribution of the delivery area and the kitchen the chef can dispense the food through the convecto machine, the customer can see the preparation and 	10	in a constant 1% hygienic quality Self -supporting shower drum winch integrated in the body of the kettle the shower is inaccessible when the door is closed – allows food in the food processor to be rinsed out - if necessary to speed up cooling	
6	 maintenance of the food during dispensing Adaptation for roasting chickens the chamber of the convection oven is designed to collect baked fat, the machine is equipped with a container for collecting fat grease does not drain into the sewer, does not destroy the machine's waste system 	11	 Six-speed fan, reversible with automatic calculation of direction change in cooperation with the symbiotic system, it ensures perfect steam distribution without losing its richness its operation is controlled by the program or manually allows the preparation of a variety of dishes from the most delicate to high temperature baking at the highest speed
