1

#### **Granuled ice**

ice pulp is wet, dissolves faster  
– no ice crusher is needed - time saving

2

#### **The most effective evaporator on the market**

lower energy consumption and faster ice pulp production  
– saving energy costs, time saving

3

#### **Vapor without sealing joints and seals**

a solid uniform design of the evaporator  
– easy to clean

4

#### **Tropical version of the machine (class t)**

adaptation to extreme climatic conditions.  
– use in extreme climatic conditions

5

#### **A backlit rocker switch**

simple operation even in reduced visibility or in the dark  
– saving time and the possibility of turning on and off the device even in the dark or in reduced visibility

6

#### **Refrigerant - gas R292**

refrigerant with very low benefits to global warming and low energy consumption.  
– ecological use and economic savings

7

#### **Powerful speed reduction at the top**

convenient service, higher speed of production  
– time saving, human work, economic savings

8

#### **Stif: a construction supported by 4 -steel columns**

strength  
– the possibility of higher loads and a difficult deformation

9

#### **SFVS front ventilation**

allows the units of the unit to the interior  
– variability of the location of the device
