Combi convection steam oven SLIM electric 10x GN 1/1 automatic cleaning direct steam touch screen 7" 400 V
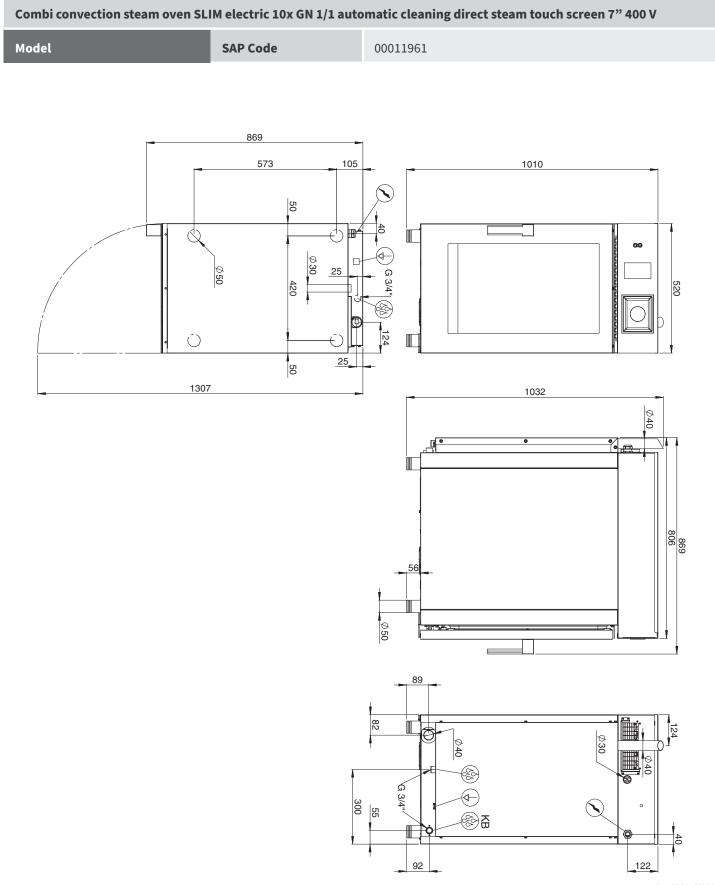

Model	SAP Code	00011961

– Steam type: Injection
– Number of GN / EN: 10
– GN / EN size in device: GN 1/1
– GN device depth: 40
– Control type: Touchscreen + buttons
– Display size: 7"
– Humidity control: MeteoSystem - regulation based on direct measurement of humidity in the chamber (patented)
– Advanced moisture adjustment: Supersteam - two steam saturation modes
– Delta T heat preparation: Yes
– Automatic preheating: Yes
– Multi level cooking: Drawer program - control of heat treatment for each dish separately
– Door constitution: Vented safety double glass, removable for easy cleaning

1 Double loading insert, longitudinal

inserts formed from rigid stainless steel wire allowing insertion of GN, double insertion, and the possibility of inserting divided GN

– the possibility of inserting more GNs in the case of shallow GNs and the possibility of cooking larger quantities of food, or more types of food

2 Narrow body

economical construction with a panel placed on top of full-size GN 1/1 inserts

– full-featured kettle for small spaces

3 Direct injection

steam generation by spraying water on the heating elements directly in the chamber

– simple and efficient solution
– moist steam with water droplets

4 Touch screen display.

simple intuitive control with unique pictograms everything in Czech
the possibility of using preset programs or manual control

– help with cooking even for less skilled cooks, safe baking even in the absence of an operator; create your own recipes; easy to use

5 Weather system

patented device for measuring steam saturation in real time and in steam mode, the only one on the market

– precise information for the operator about the steam saturation in the cooking area

6 Steam tuner

a control element that allows setting the exact saturation of steam in the cooking chamber during the cooking process

– possibility of cooking different types of cuisine, from very moist steam for typical Czech dishes to low-saturated steam for e.g. French cuisine

7 A kit of two machines on top of each other

connection kit allowing two machines to be placed on top of each other
connects the connections, inlets, wastes and ventilation of the lower combi oven

– allows the user to place two machines in smaller spaces to increase production; the chef can prepare two different dishes simultaneously

8 Automatic washing

integrated chamber washing system
the possibility of using liquid and tablet detergents
option to use vinegar as a rinse aid
the system also descales the micro boiler

– the chamber of the conveyer is washed without the presence of the operator, for example overnight; the system decalcifies the micro-boiler without the need for service intervention; the chamber is maintained in a constant 100% hygienic quality

9 Six-speed fan, reversible with automatic calculation of direction change

in cooperation with the symbiotic system, it ensures perfect distribution of steam without losing its saturation
its operation is controlled by the program or manually

– allows the preparation of a variety of dishes from the most delicate to high temperature baking at the highest speed

10 External temperature probe

temperature probe located outside the cooking area
choice of single or multipoint probe or vacuum probe

– positioning outside the cooking chamber extends its life; ensuring total food hygiene safety; HACCP record; control of heat treatment in the absence of the cook

11 Longitudinal insertion to GN

penetration placed on the depth of the machine
exchangeable for 600x400 sheet metal inserts

– possibility of inserting the whole range of GNs, not just the 1/1 size, possibility of using 6x3 baking trays
