

Product features

High-capacity boiling kettle gas indirect 300 l

Model SAP Code 00019625

- Device type: Gas unit
- Device heating type: Indirect
- Ignition: Electric
- Steam pressure regulation: Automatic the pressure switch regulates the performance of the device
- Filling: Mechanical cock
- Jacket filling: Semi-automatic
- Drain valve diameter: 2"
- Basin volume [l]: 300
- Usable volume [l]: 280

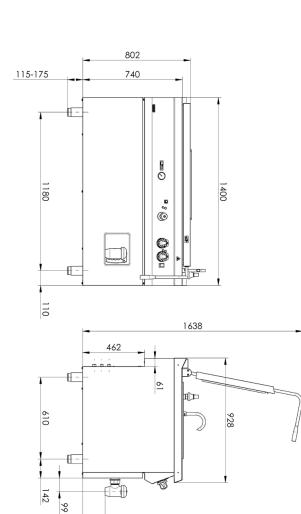

SAP Code	00019625	Power gas [kW]	40.000
Net Width [mm]	1400	Type of gas	Natural gas, propane butane
Net Depth [mm]	928	Basin volume [l]	300
Net Height [mm]	900	Usable volume [l]	280
Net Weight [kg]	250.00	Device heating type	Indirect
Power electric [kW]	0.023	Steam pressure regulation su	Automatic - the pressure switch regulates
Loading	230 V / 1N - 50 Hz		the performance of the device

Technical drawing

High-capacity	boiling	kettle gas	indirect 300) l

Product benefits

High-capacity boiling kettle gas indirect 300 l

Model SAP Code 00019625

Top cover in front panel design

thanks to the design, the lines of the front panel and the lid are unified, the designed design allows easy maintenance by the user

- thanks to the design, the condensate is drawn to the back of the lid, eliminating the risk of scalding the operator with hot condensate; the user saves time and energy when maintaining the product
- Ergonomic extended handle

even people of smaller stature can comfortably lift the lid to the fully open state

- the operator will not be scalded by steam when the lid is raised to the fully open position.
- Sloped bottom for the sink
 the entire volume of the container will flow out without
 - the need to carry the food to the sink
 no residual puddles on the bottom of the cooking vessel; eliminates losses when food is poured out of
 - Reinforced bottom without deformations

thanks to the reinforcements in the intermediate shell, the service life of the duplicator is extended, there is no deformation due to heat and expansion of the material

- several times longer life of the cooking vessel, where the reinforcements prevent tearing or deformation; the user does not have to replace the product with a new one after years of use, thus saving costs
- Spill-resistant design controls

the cooking vessel

ergonomically comfortable, preventing water from entering the device

- due to the sufficient coverage of the controls, water does not leak into the device, thus prolonging the life of the control or eliminating the potential risk of leakage into the functional components of the device
- Lines in the container

the operator knows at a glance how much food is inside the cooking vessel

 time-saving for the product operator when filling water or measuring the total quantity of food to be prepared

Duplicator automatic venting

thanks to the integrated pressure switch, the pressure in the intermediate casing is automatically regulated

- the user can concentrate on food preparation or ingredients as he does not have to monitor the pressure in the intermediate vessel.
- Rotatable filling arm convenient filling of the duplicator container, the

hanger is used for maintenance and cleaning of the cooking container

- convenient filling and cleaning of the cooking vessel, but the hanger does not interfere with the cooking vessel, thanks to its position on the top plate
- Integrated waste overflow

condensed water drains directly from the top plate

- elimination of the risk of the operator slipping on the wet floor; excess liquids are drained directly into the central waste and not in front of or under the equipment
- Glass door

easier operation and cleanability, water does not flow over the edge on controls and service the top plate retains its stiffness without deformation over time due to use

- operator safety when using the product, hygiene and strength of the equipment
- Integrated waste overflow

the operator can check the pressure in the intermediate casing

- the operator receives real-time information about the pressure in the intermediate layer and thus checks the correctness of the function and the efficiency of the energy used
- A pre -prescribed upper lid with a lifting mechanism

lid holds open in different positions

 when partially opened, there is no large heat loss and thus energy savings are achieved

Technical parameters

High-capacity boiling kettle gas indirect	
Model	Code 00019625
1. SAP Code: 00019625	15. Power gas [kW]: 40.000
2. Article group:	16. Ignition:
Kettles	Electric ————————————————————————————————————
3. Net Width [mm]: 1400	17. Type of gas: Natural gas, propane butane
4. Net Depth [mm]: 928	18. Protection of controls: IPX4
5. Net Height [mm]:	19. Device color:
900	Stainless steel
6. Net Weight [kg]: 250.00	20. Material: AISI 304 top plate and cladding
7. Gross Width [mm]: 1435	21. Indicators: operation and warm-up
8. Gross depth [mm]:	22. Drain valve diameter:
1030	2"
9. Gross Height [mm]: 1085	23. Worktop type: Molded - comfortable cleaning maintenance
10. Gross Weight [kg]: 260.00	24. Worktop material: AISI 304
11. Device type:	25. Worktop Thickness [mm]:
Gas unit	2.00
12. Construction type of device: Stationary	26. Surface finish: polished stainless steel
13. Power electric [kW]: 0.023	27. Device heating type: Indirect
	an Particular III

14. Loading:

230 V / 1N - 50 Hz

28. Basin volume [l]:

300

Technical parameters

High-capacity boiling kettle gas i	indirect 300 l						
Model	SAP Code	00019625					
29. Device capacity [l]: 300.00		39. Type of pan: Fixed					
30. Maximum device temperature [°C]: 100 31. Number of power control stages: 2 32. Service accessibility: Trough the frontal panel 33. Safety element: manometer safety fitting safety thermostat		40. Usable volume [l]: 280 41. Filling: Mechanical cock 42. Jacket filling: Semi-automatic 43. Basin shape: Practically shaped bathtub spout to minimize spillage					
				34. Safety thermocouple: Yes		44. Steam pressure regulation: Automatic - the pressure switch regulates the performance of the device	
				35. Safety thermostat: Yes		45. Type of drain valve: conical	
				36. Adjustable feet: Yes		46. Overflow: Yes
